**SUSTAINABILITY
EXCELLENCE**

We invite you to join the 3rd GPCA Sustainability Conference to learn more about the emerging expectations on GCC businesses to improve their sustainability performance, while also contributing to the national and regional development visions. Experts will share knowledge on how a business can tangibly implement sustainability in a way that reduces risk, improves efficiency and drives bottom line financial results. The conference will draw heavily on chemical industry sustainability performance data, examples of good practices and leadership perspectives to help provide insight into the current state of sustainability implementation of the Arabian Gulf region.
